It is well known that information and communication technology has greatly affected the library system. Today computers have become an integral part of the modern library system. The traditional library system has been transformed into a digital system. In the near future, the day will come when libraries will be ruled by AI. In today's digital age, libraries are multitasking. Library professionals are not only displaying their skills in the library but also outside the library to provide the right information at the right time to the stakeholders. This multitasking performance of library professionals is reflected in the articles published in this current issue of the journal.

Total 12 articles are published in the issue. With the primary objective that to analyse the impact of X (Twitter) discussions and their impact on article citation counts Prashanta Kumar Behera, Ashok Kumar, and Sanmati Jinendran Jain studied the relationship between High X (Twitter) Mentions and Citation Counts in the Field of Telemedicine
